## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3-4, 11-13 and 15-16, drawn to a recombinant vector comprising in sense orientation a DNA encoding a transcription factor controlling a phenylpropanoid biosynthesis pathway and cells and plants transformed therewith, classified in class 800, subclass 298 for example.
- II. Claims 3, 11-12 and 14, drawn to a recombinant vector comprising in antisense orientation a DNA encoding a transcription factor controlling a phenylpropanoid biosynthesis pathway and cells and plants transformed therewith, classified in class 800, subclass 284 for example.
- III. Claims 17-18, drawn to an isolated protein with the activity of a transcription factor controlling the phenylpropanoid biosynthesis pathway, classified in class 536, subclass 23.6 for example.

Claims 3, 11-12 link(s) inventions of Group I and Group II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 3, 11-12. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional

Art Unit: 1638

statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions of Groups I and II have different functions than the invention of Group III. Groups II and I are drawn to recombinant vectors comprising either sense or antisense cDNA of a phenylpropanoid pathway transcription factor, and plants transformed therewith. The isolated transcription factor protein of Group II has different chemical structure and function from the nucleotide sequences of Group I. The isolated transcription factor protein of Group II also cannot be used to make the sense or antisense plants of Groups I and II.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are the recombinant vector comprising the cDNA encoding the phenylpropanoid pathway transcription factor in sense orientation and the recombinant vector comprising the cDNA encoding the phenylpropanoid pathway transcription factor in antisense orientation. The effect of expressing the cDNA in sense orientation will have a different effect than expressing it in antisense orientation.

Art Unit: 1638

Because the inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classifications, recognized divergent subject matter, and because the search required for one of the groups is not required for another restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37) CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
